

Josep López Hernández

Software Engineer → 5 years of experience

SEARCHING FOR

An opportunity where I can apply my knowledge in front-end development to build more robust user interfaces and applications. I want to be part of a team that collaborates to solve real-world problems.

EXPERIENCE

redventures.com, Engineer

November 2021 - Present | [Remote](#)

- Developed a CLI that allowed to run different versions of our configurable app.
- Developed a dynamic component that was injected at compile time that allowed our widgetized app to change configuration properties based on the development environment.
- Implemented a caching system that allows our widgetized app to be used in incognito browser sessions.

gasolinamovil.com, Software Engineer II

February 2021 - November 2021 | [Remote/Office](#)

- Designed, built and maintained cross-platform mobile applications using (Ember.js/Cordova)

eventray.com, Software Engineer

April 2019 - February 2021 | [Puerto Rico](#)

- Developed a cross-platform (Windows, Linux, Mac) react.js/electron.js desktop application for printing badges and tickets at conferences. Created a WYSIWYG designer for our users to brand the kiosk to match the event that synced in real-time with every on-site computer at the event.
- Developed a cross-platform mobile (iOS, Android, Web) react-native application for running virtual events. Created an application for building out a conference website (speakers, sponsors, agenda) and designing the website to match the conference branding. Using react-native and react-native-web we were able to utilize the same react.js components across all platforms.
- Wrote end-to-end selenium test in python to validate the web application integrated properly with the API as well as prevent any regressions.

EDUCATION

Front-End Nanodegree, [Remote](#) — Udacity

June 2018 - November 2020

 (787) 409 - 8573
